SKILLS

Programming Languages	Python, C++, SQL
Computer Science	Data Structures and Algorithms, Object-Oriented Programming (OOP), SDLC
Backend & APIs	FastAPI, REST APIs, Swagger/OpenAPI, Microservices Architecture
Databases & Storage	MS SQL Server, PostgreSQL, Snowflake, Vector Databases
Cloud & AI Services	Azure OpenAI, Azure AI Search, Azure Document Intelligence, Azure Cognitive Services
GenAI & LLM Engineering	LLMs, LangChain, LangGraph, Agentic AI, Multi-Agent Systems, MCP, RAG, Prompt Engineering, Model Fine-tuning, LLM Evaluation
LLMOps & Deployment	Docker, CI/CD, Model Monitoring, AI Application Deployment, Workflow Orchestration, Production AI Systems
Speech & Vision AI	Azure Whisper STT, Text-to-Speech (TTS), YOLO, Computer Vision
Tools & Version Control	Git, GitHub
Emerging & Applied AI	Enterprise Chatbots, AI Interview Systems, Document Intelligence, Agentic Workflows, End-to-End GenAI Solutions, Open-source LLMs

EDUCATION

Bachelor of technology in Computer science and Technology 2020-2024, KUK University	9.0 CGPA / 86%
Class XII(PCM) 2019-20	Scored 95% in PCM
Class X 2017-18	Achieved 92

PROFESSIONAL EXPERIENCE

• Ksolves

Data Science Engineer - Gen AI

April 2026 - Present

- Working on enterprise-grade GenAI and LLMOps initiatives involving model orchestration, prompt engineering, evaluation workflows, deployment pipelines, and AI application lifecycle management.
- Contributing to the design and implementation of agentic AI systems, RAG architectures, vector databases, and cloud-based AI solutions to support scalable business applications.

• CGM

Generative AI Developer

September 2024 - March 2026

- Developed AI-driven healthcare solutions utilizing Large Language Models (LLMs), Azure OpenAI, Azure Document Intelligence, and Retrieval-Augmented Generation (RAG) pipelines to automate clinical document processing and data extraction workflows.
- Built secure and scalable Python-based applications delivering real-time transcription, document summarization, and structured JSON outputs tailored for healthcare use cases.
- Integrated SOAP APIs with internal apps for document processing, with monitoring, API maintenance, and PostgreSQL ORM storage.

INTERNSHIP EXPERIENCE

• Lagozon technologies pvt. Ltd.

Gen AI Developer

January 2024 - August 2024

- Spearheaded a groundbreaking initiative at Lagozon Technologies to develop an AI assistant for Jubilant FoodWorks, leveraging Large Language Models (LLM) and Azure Open API. Enhanced the user experience through sophisticated speech recognition and prompt engineering techniques.
- Led the secure integration and management of API keys using the Lida framework, ensuring optimal data security and processing capabilities. Implemented robust data storage solutions with Snowflake and managed Stored procedure, enhancing data flow and system efficiency.

• FARMICON - IIT Roorkee

Research & Machine Learning Analyst

July 2023 - September 2023

- Collected and analyzed government and IoT datasets for agricultural insights.
- Developed and deployed an ML model to predict crop nutrient requirements.

PROJECTS

Simplifyrecruit: AI Interview Assistant

- Built an end-to-end GenAI interview platform that autonomously conducts technical interviews by parsing resumes, generating role-specific questions, evaluating responses, and producing scored hiring reports.
- Developed a real-time AI proctoring system using computer vision and speech technologies to monitor candidates, enforce interview policies, and support live moderator intervention.
- **Technologies Used:** LangGraph, LangChain, Azure OpenAI, FastAPI, React, YOLOv8n, WebRTC, Azure Whisper STT, Microsoft Neural TTS, PostgreSQL, Docker.

Low code to Pro Code: Nokia

- Built an autonomous agent that converts Langflow visual workflows into production-ready Python applications with LangGraph orchestration, Chainlit UI, and Docker deployment support.
- Engineered a self-healing code generation framework that automatically validates, reviews, and fixes workflow, dependency, configuration, and integration issues before deployment.
- **Technologies Used:** LangGraph, LangChain, Azure OpenAI, Chainlit, Docker, MCP, FAISS, Qdrant, ChromaDB, Python, FastAPI, Multi-LLM Orchestration.

MedClaim AI: Automated EOB to 835 Conversion System

- Developed an AI-powered system to automate EOB-to-ERA (835) conversion, replacing third-party tools and streamlining the medical billing process.
- Integrated Azure Document Intelligence and GPT models with a custom-trained AI rule engine, enabling accurate data extraction, validation, and 835 generation from EOB and 837 files.
- RAG-based validation using Azure Cognitive Search and Azure OpenAI Embeddings to cross-check AI-generated medical codes against internal databases, with all processed data securely stored in Azure Blob Storage.
- **Technologies Used:** LLM, Azure Document Intelligence, Azure OpenAI GPT Models, Azure Blob Storage, Azure Cognitive Search, Prompt Engineering, AI Rule-based Training System (CPT, ICD Code Mapping), Azure DevOps.

GEN AI JUBIL ASSISTANT: Jubilant Foodworks

- Developed a web application where non-tech users can input prompts, and the GEN AI assistant generates SQL queries along with table outputs and dynamic visualizations for each unique answer.
- Utilized prompt engineering, data retrieval from Snowflake, and dynamic visualization creation using LIDA to ensure comprehensive and user-friendly data insights.
- Leveraged an **open-source LLM** (LLaMA 2-7B) for natural language to SQL generation, enabling efficient query creation from user inputs.
- **Technologies Used:** LLM (LLaMA 2-7B), OpenAI API, Snowflake for data management (including SnowSQL for views and table formation), LIDA for dynamic visualization, Azure App Services for deployment.

NOTABLE ACHIEVEMENT

• Finalist in ISRO Mapathon	2020	• ICIIP Patents	2021
• Former Student’s Captain	2020-2021	• Lead Igniters of D2C Club (Unstoppable)	2022-2024
• Finalist in Innothon (Crop Analysis)	2021	• 2nd Rank in National Hackathon(IIT Roorkee)	2023
• Yuva Innovator Finalist	2021	• SIH 2023 finalist (Internally)	2023
